**XPEDX PRINTING TECHNOLOGIES NAMES WILLIAM STAHL
SHEETFED DEMONSTRATOR AND TRAINER FOR NEW RYOBI
DEMONSTRATION AND LEARNING CENTER**

Center to open late October in Lenexa, Kansas

LENEXA, Kansas, September 13, 2007—William Stahl has been named sheetfed demonstrator and trainer for the new RYOBI demonstration and learning center in Lenexa, KS. The center will be operated by xpdx Printing Technologies, the exclusive marketer and distributor of Ryobi-branded printing presses in the U.S.

“Bill’s extensive experience as a pressman and his clarity in teaching and training will help printers who visit our new demo center get a good understanding of Ryobi press capabilities,” said Darren George, operations manager for xpdx Printing Technologies.

Stahl will also train new Ryobi equipment owners and users prior to presses being installed at their facilities.

Stahl is a 21-year-veteran press operator who has worked for large printers including Tursack Inc., a Consolidated Graphics Company, and Strine Printing Company, Inc.

His career as a pressman has given him a strong working knowledge of high-end bookwork, annual report production and more, as well as expertise on UV and other press technologies.

xpdx Printing Technologies, a division of xpdx, is the exclusive U.S. marketer and distributor of Ryobi-branded offset printing presses, parts and supplies. International Paper and Stora Enso are the preferred providers of uncoated and coated paper to the RYOBI demonstration and learning center.

Information about Ryobi presses is online at ryobi.xpdx.com or phone 800-553-4980.###
